*Quest for Excellence*

## Our Mission

Quest for excellence is our motto. The school includes modern international educational ideas and strives to provide an academically challenging environment in order to foster intellectual curiosity and a sense of responsibility in our students. We are committed in cultivating lifelong learners and balanced, service oriented citizens, who will be, thereby prepare to contribute positively in a globally competitive world.

The school is dedicated to prepare conscientious and responsible citizens with a sense of integrity and honesty with a spirit of adventure, exploration, research and creation. The school believes in fostering each individual's potentialities providing opportunities for successful learning and growth. The school trains the students in such a way that they learn to shoulder responsibilities and handle situations independently.

## Our Vision

To create an environment leading to moral, intellectual, healthy, productive and successful lives for the students.

U. K. School is dedicated to the development of a wholesome foundation for a generation. To nurture the latent talent in students. School believes that freedom of spirit & zeal for discovery are as important as the need for discipline & a sense of duty. To work to cultivate a thirst for knowledge in every student. To build ideal citizen & good human being. School ensures that students feel safe, secure and supported at all times and School help the child to become self- confident, committed & diligent. School fosters a quest for excellence amongst students in their respective choice of interest.

Mr. Nitin Mane  
Chairman  
Universal Knowledge School

### Chairman's Message

We welcome you to U.K. School, to a world of learning in enjoyable ways, to a world where every child is challenged to grow to his or her full potential. Our goal is to equip children to think and act critically and to be creative in their responses. At the same time, we want them to be aware of their history and be critical of the tradition of our civilization. We encourage them to be aware of alternative views of the world and to be perceptive of the world around them. Thus, we synthesize internationally acclaimed pedagogical practices with India's rich educational and cultural heritage. Besides a single-minded pursuit of academic excellence, we focus on children's all-round development.

We see academic excellence as an outcome of what we do every day here. We believe that education should enable children to develop a rich personality. While focusing on their areas of interest, it should also offer them the opportunity to explore a wider horizon and empower them to deal successfully with the problem of the rapidly changing times. Education should infuse in them qualities of diligence and practicality to enable them to effectively apply to real-life situations what they learn. All activities within the classroom or outside aim at nurturing creativity, fostering observation, inquiry and critical reflection, building confidence and self-esteem, shaping character and inculcating abiding values of tolerance and compassion, and appreciating diversity and internationalism. We warmly welcome you and seek your co-operation. Let us together mould the future generation to be strong citizen and more progressive than us.

## Why Universal Knowledge School?

The CBSE curriculum aims to provide the modern and best quality education to the students. It is one of the most reliable and recognized boards across the country. UK School, a CBSE board affiliated, makes students learning process simple and future ready, with our informative educational pattern, Our CBSE programme is balance of skill-based learning and holistic education to let students focus on academics as well as over all development.

## School Building

School building is designed by a reputed and experienced architectural firms specializing in school architecture. This ensures scientifically designed space giving maximum learning. Structures are designed by renowned Structural Consultant ensuring solid and earthquake resistant structures. The building design follows National Building Code standards, related to seismic zone, climatic compatibility etc.

We believe that the school's vast green spaces reignite the love for nature.

Green landscape provides with plenty of open space and wide passages for safe mass movement of children.

Classroom sizes are 440 sq. ft. each, with design emphasis on natural lighting and ventilation. All the activities of the school are conducted in separate rooms ensuring change of venue and interest.

Seating arrangement - Separate bench is provided for each student.

Classroom

Digital Classroom

U.K. School has well-equipped Science and Math Labs allowing students with an intuitive and hands-on learning environment.

Indepedent Computer Lab

More than 2500 reference books are available in the library.  
 Best part about library is student not only enjoy reading and acquire knowledge but also give their sincere review about the gained knowledge.

## Play Ground

The school has picturesque playground of size 100 meters X 65.5 meters.  
 Our Physical Education and Sports programme aims at improving the health and fitness levels of all our students and has been structured to develop stamina, sportsmanship, mindfulness and skills that meet the varying needs of different age groups. Football, Cricket, Badminton, Basketball, Volleyball, Gymnastics, Yoga, Karate, Table Tennis and Chess are some of the sports that hold prominence in our extensive Physical Education Programme.

 Responsibility  
 Gratefulness

Commitment  
 Integrity  
 Self-Discipline

Determination  
 Perseverance  
 Teamwork

## Focused Pre-Primary Section. (Foundational Stage)

Researches on Pre School education have shown that children taught at an early age usually have improved social skills, fewer behavioural problems and better grades without special attention. Self-confidence gained by learning in a playful manner adds to the personality development of the child.

The child's positive learning attitude, the basic foundation in language, comprehension and management, help the teacher facilitate the child's learning at kindergarten and higher levels of education.

Moreover, childhood education specialists claim that young children learn best when they have an opportunity to interact with their peers, and their parents and instructors treat them kindly. They bloom well in a tension free environment. Besides, they comprehend and learn things better if they are introduced to new things in small portions.

### LEARNING GOALS IN A PRE- SCHOOL :

- Children learn a great deal in preschool. The emphasis is on the cognitive development of the child as learning is due to practice and interaction in a big group.
- Social interaction is the second most important feature of Pre School education. The kids learn to interact with children of their own age in a supervised environment.
- Playing with mud, holding crayons, practicing free colouring and writing on board helps in motor development of the children. Both fine motor & gross motor development takes place by the various activities performed in the classroom under the supervision of trained teachers.
- The child is prepared for the curriculum of the structured schools.
- The children are involved in oral activities like poem recitation, story telling, role-playing, singing songs, hymns and prayers. All these activities help in improving their oratory skills. They learn to speak in groups.
- Phonological awareness - is the most important feature of pre school education. Children learn to identify the sounds of the alphabet. They learn to recognize the alphabet by listening to the sound.
- Pre writing skills developed by the use of coloring with crayons and writing on blackboard with chalk in free style manner.
